DIVISIONS / AFFILIATES

Jerry Fournier brings decades of experience in Bay Area and Sacramento construction. As a Project Manager, Jerry thoroughly enjoys being involved in every aspect of the construction process, from initial client introduction, to feasibility, conceptual design, budgeting, on through the course of construction and completion of each individual project. He understands the importance of relationships that are created with clients, manufacturers, and sub-contractors. It is through these relationships of trust that successful projects are built. Having obtained his general contractors license in 1982, he was instrumental in establishing strong relationships with sub-contractors, architects, and developers.
